CORRESPONDENT'S MESSAGE

"Making the right decision; Choosing the right school"

In life, No ONE and NOTHING will help you until you start helping YOURSELF.

Education is a vital investment for human and Economic development. It is a universally accepted fact that Education is considered the most powerful instrument. It helps us to interpret things rightly and apply it in real life. It does not mean that Education is only limited to lessons in classes but Education can also be obtained from lessons taught by life. With Education only a person can gain knowledge.

Apart from that, we can build good manners through Education. Education helps to build a person's characters as it teaches the right behaviour. It is also important in developing a person's characters which can make a person to be more civilized and matured.

As we all know "Education is a key to success", it gives us knowledge of the world around us, while opening doors to brilliant career opportunities.

If the learner is confident, learning increases. If the learner believes the teacher, learning increases. Both the parents and teachers must be patient with the children at home as well as in school.

Good two way communication between families and schools is necessary for your students' success. Not surprisingly, research shows that more parents and teachers share relevant information with each other about a student, the better equipped both will be to help that student achieve academically.

"When the children do not get the right opportunity, they struggle to establish themselves in life". So, "our First Service is to Parents, and our real service is to Students".
